

DAM Elevator

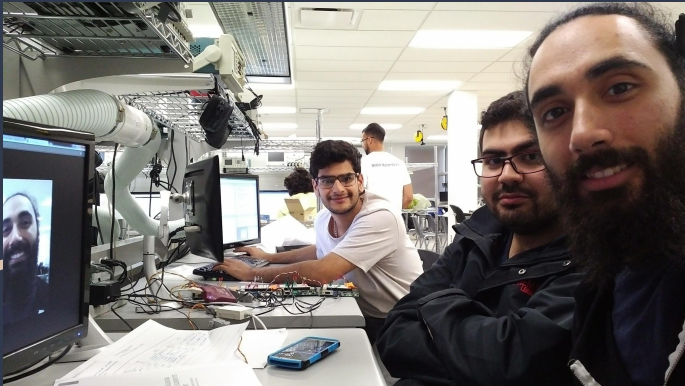

By: Anas Yaseen, Dinkar Sharma, and Mike
Akl

A dark blue diagonal gradient bar that starts from the bottom left corner and extends towards the top right corner, covering the lower half of the slide.

Topics

- Introduction
- Phase 1 Milestones
- Phase 2 Milestones
- Phase 3 Milestones
- Conclusion

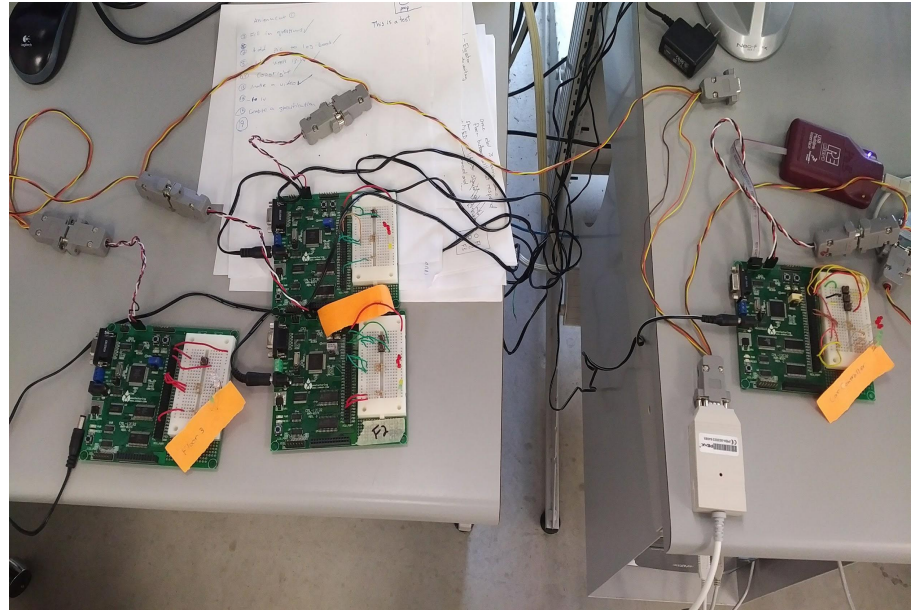

Introduction

- Project Charter Academic Need:
 - “This Project provides students with an opportunity to study and apply design principles for networked systems.”
- This project allowed us to use many of the things learnt in this semester. From CAN to HTML there were tons to do.
- Glad to saw we were able to achieve all the deliverables

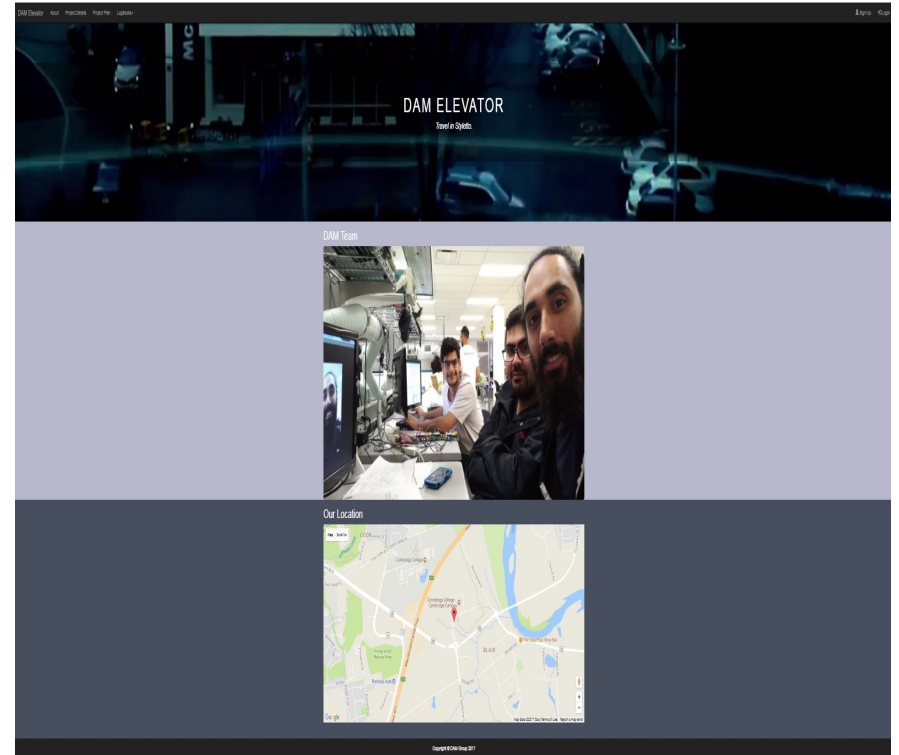

Phase 1 Milestones

- In phase 1 we needed to build all the elevator nodes.

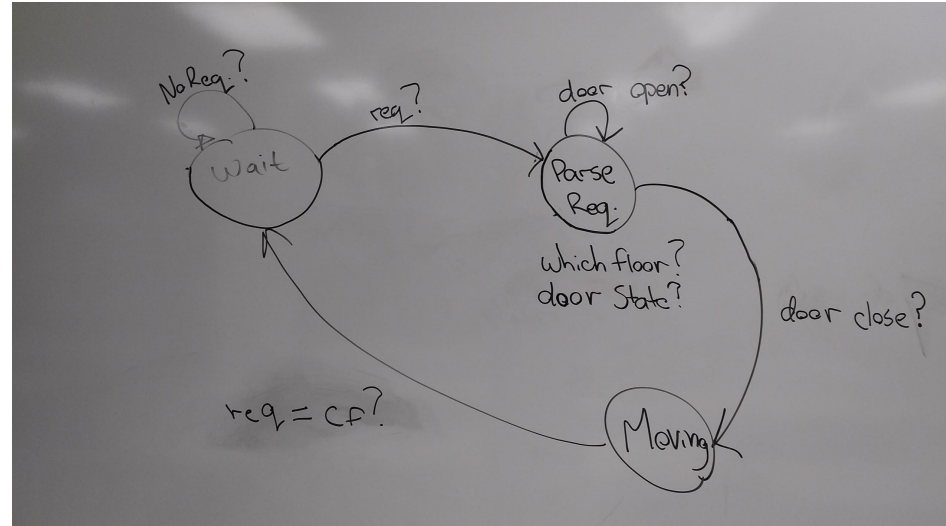

Phase 2 Milestones

- In phase 2, we built the front and back-end for the project. This included HTML, CSS, PHP, JavaScript and MariaDB work.

Phase 3 Milestones

- In phase 3, everything comes together! Needed about to connect the elevator nodes to the front and back end work done in the second phase.

Conclusion

- Lots of new things learned
- Some difficulties but all was overcome
- Lots of work but a good project over all
