ED - Engineering Design	Mastering	Proficient	Developing	Emerging
ED4 - Implementation	4 points Implement a CAN node to interface with the Logging & Control PC	3 points	2 points	1 point
ED4 - Implementation	4 points establish PC-CAN communication	3 points	2 points	1 point
ED4 - Implementation	4 points establish diagnostic data logging into the data repository	3 points	2 points	1 point
ED4 - Implementation	4 points Integrate the feedback control module to the system	3 points	2 points	1 point
ED1 - Design	4 points Develop a finite state machine for the elevator operation logic	3 points	2 points	1 point
ED4 - Implementation	4 points Implement a finite	3 points	2 points	1 point
